

April 9, 2020

Goodwill recently announced the [COVID-19 Emergency Fund](#), which was established to provide critical financial support for Goodwill to continue providing a wide variety of services through this pandemic.

Many of the people and families Goodwill serves have been affected by the closure of our retail stores and the reduction of access to critical mission programs. They need your help now more than ever.

While this situation is unlike anything we have ever faced, this is why Goodwill was created over 90 years ago. Today we are inspired by the Hoosiers who have already made generous donations to the COVID-19 Emergency Fund **totalling over \$150,000** since it was launched last week. With this support, we are well on the way to helping thousands of families. If you have donated, **thank you!**

There is still time to have your gift tripled, thanks to a 2:1 match from the Goodwill Foundation, for the first \$250,000 in donations. **With your help, we can continue to positively impact the lives of our fellow Hoosiers. If you're able, please give today at goodwillindy.org/donatenow.**

As we continue to deal with this growing pandemic, Goodwill is also asking for your help to support medical professionals and local hospitals through donations of Personal Protective Equipment. If you have any of the following items, please donate them at your local Goodwill:

- Powered air-purifying respirators (PAPR)
- Face shields
- Protective eyewear (goggles, glasses, etc.)
- Surgical gowns
- Sanitary disposable gloves
- Surgical masks
- Hand sanitizer
- 3-ply surgical masks

Thank you for being an advocate of Goodwill! Together, we will continue to improve lives across central and southern Indiana.
